TO ARCHITECTS, BUILDERS, &c.

ALL descriptions of TERRA COTTA, CEMENT, and PLASTER CASTINGS, executed in a superior manner, on reasonable terms, by J. HERBERT and SON, Modellers, &c. 48, Pudding-street, Drury-lane. A splendid assortment of Corinthian, Ionic, and other Capitals, Centre Flowers, Balusters, Trusses, &c.; Elizabethan and other Chimney Shafts.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

GEORGE and THOMAS EARLE, CEMENT MANUFACTURERS, HULL.

Light and Dark Coppel to any shade.

Also, Manufacturers of PLASTER, MASTIC, &c.

Importers of MARBLE and PORTLAND.

Dealers in Stone, Slabs, Hair, Whiting, &c.

ROMAN and OTHER CEMENTS, Manufactured by J. M. BLASHFIELD, successor to the firm of PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Terras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.

Manufactory, Mill Wall, Poplar. Depôts, Commercial-road, Lambeth, and Paddington-basin.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes as a quick-setting cement that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster; and Basinghall-street, Liverpool.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal use.—These well known hard stuccoes dry quickly, and can be painted upon within a few days. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

PORTLAND CEMENT is the cheapest, because the best Cement for external uses. Asphaltes, it requires no colouring, does not crack, and is less affected by frost. As a mortar for brick work, it may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 17, Millbank-street, Westminster, and Red-street, Liverpool.

PORTLAND CEMENT, in Casks of Four Imperial Bushels. QUANTITY, NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

PORTLAND CEMENT.—The difficulty of preserving that valuable Cement of uniform colour and strength has hitherto prevented its more general use. Contractors and Builders with dread that these two important qualities may be varied, and to obviate this objection, have recently contracted with CHARLES J. HILTON, at his Roman and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, as also at his Wharfs in London, 5, Upper Thames-street, City, and Great Scotland-yard, Westminster, orders can now be received to any extent.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works, Mill-wall, Poplar; St. Andrew's Wharf, Hart-street, Blackfriars, or Middle Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, French and English Plaster, &c.

PORTLAND CEMENT WORKS, NORTH-FLEET, KENT.—Messrs. ROBINS and CO. solicit the attention of their friends and the public to their superior Cement, confident that the great improvement in the manufacture thereof during the present year will insure to them a continuance of that patronage with which they have so long been favoured. Orders received at the Works, and at Great Scotland-yard, Whitehall.

May 5, 1852.

PORTLAND CEMENT.—CHARLES RICHARDSON has the pleasure to introduce to the trade the above superior CEMENT, being of uniform colour and quality to dampers as never before obtained in Portland Cement. It possesses extraordinary accumulations qualities, resists the action of frost and heat, and is more durable than any other Cement; deadens vegetable, turn green, or crack; combined with which its cement is prevails proportions among it is seen on the first occasion of its use for work where all the above qualities are required. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the finest stones, but is much better adapted for engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Cherbourg; is a similar work at Aldernay, and at Dover Bore Pier, to unite the masonry. The foundations of the centre piers of the Worcester Bridge, at Mount Straits is laid in Medina. A large groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and pebbles. The work extends 600 feet into the sea, and is exposed to the most violent rules of the Channel, in a position where every former construction had been repeatedly washed away. The immense strength of the resulting concrete of Roman Cement are superseded by the use of this improved manufacture.

CRAK FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Sandown, Isle of Wight.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNSON and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing many advantages over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One coat will cover two square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external purposes, possesses above all other materials of its kind (it has no caustic qualities); may be painted or papered in a few days; never blisters, cracks, or repeeches; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and reports to be had, and may be obtained on application to the Sole Agents, PHILIP HARE and Co. at the Warehouses, 11, Scroll yard, Upper Thames-street. A liberal allowance to wholesale dealers.
